

IRVING, Texas, March 14, 2022: Exela Technologies, Inc. (“Exela”) (NASDAQ: XELA) today announced the launch of DrySign® in Germany and France. The launch is part of Exela’s plan to offer DrySign throughout the globe. DrySign is already launched in North America, India, the UK and Philippines and continues to see strong user uptake.

DrySign enables users to seamlessly e-sign documents anywhere, anytime in a sustainable manner. As a sustainable platform it eliminates the need to print, scan, and post documents, ultimately saving paper and benefitting the environment.

In addition, DrySign flawlessly integrates with Exela’s Digital Mail Room (“DMR”) solution, a holistic document management system that digitizes mail and other documents to create efficient digital workflows. Using DrySign, DMR’s users can select signatories, send documents for remote signing, and get signed copies updated on their DMR dashboard in minutes.

Certified by Entrust’s PKI, DrySign is also secure, safeguarding documents through robust audit trails and timestamps. DrySign dynamic pricing ranges from free for an individual to a per user per month for enterprises.

“The overwhelming response to DrySign in the UK has further validated the business and we are encouraged by the growth prospects in the EU as well as other regions. We look forward to expanding our global footprint and are excited to offer a solution that is easy to use, sustainable, cost-competitive, and secure.” said David Jones, SVP Business Strategy, Sales and Marketing, EMEA.
