

IRVING, Texas, May 24, 2023 - - Exela Technologies, Inc. (“Exela”) (NASDAQ: XELA, XELAP), a global business process automation (“BPA”) leader, announced today a contract with a leading energy utility that manages the generation, transmission, and distribution of electricity in one of Canada’s provinces.

[Exela’s IntelliScan Raptor](#), a versatile, high-speed scanning solution capable of processing checks as well as documents replaced the client’s existing, aged check and payments equipment.

The IntelliScan scanner line supports Exela’s Exchange for Bills and Payments (“XBP”) portfolio, the largest revenue contributor in its Information Transaction and Processing Solutions (“ITPS”) segment. Exela is a leader in Bills and Payment processing with more than thirty years of experience handling payments. ITPS had a revenue of \$765 million in 2022.

Exela’s IntelliScan Raptor redefines efficacy in production scanning by coalescing speed, enhanced image quality, and unparalleled sorting and paper handling abilities. The result is a robust scanning platform which facilitates time savings, accuracy and document flexibility to deliver efficiencies in a versatile, compact footprint.

“Exela was uniquely positioned to offer a single platform for our customer’s entire scan operation and remittance platform. The platform, part of our technology portfolio and available globally, is used by customers and employees alike, making Exela one of the largest enablers of payment remittance processing,” noted Mark Fairchild, President Exela Smart Office, Exela Technologies.
