

Hawk Scanner

DATA SHEET

The Hawk scanner is an Exela tabletop stationary document scanner specifically designed to address the needs of the archive market. Developed to assist with the document scanning of very difficult documents, which requires a significantly high amount of document preparation, the Hawk allows for the capture of the front and back of each document on a single scan operation. A key feature of the Hawk is that it allows documents to be digitized with minimal preparation, which significantly increases overall productivity.

Please note that the Hawk is a special order scanner designed specifically for the archive market

Benefits

- + No mechanical mechanism used to move the paper, providing delicate handling
- + Ideal for archive conversions including damaged or delicate documents
- + File de-construction/re-construction at scan time
- + Minimal document preparation required
- + Captures the front and back of different pages simultaneously
- + Capable of imaging up to A3-sized documents
- + Offers color and/or bitonal output with 300 dpi resolution
- + Supports JPEG or archive-grade uncompressed image formats
- + Universal Scanner Control (USC) software providing configurable scan jobs
- + Windows-based controller for secure operations
